

Let's Build A Community  
Of Lifelong Learners

# THE LEARNERS HIVE

# Down The Memory Lane

Nostalgia is a complex emotion that arises from the recognition that the past is irretrievable, and that one can only reminisce about it. It is a bittersweet feeling that can evoke a sense of longing and a desire to relive the past. However, we can always cherish the time spent with each other and look forward to another amazing year ahead.

The last academic year was characterised by a spirit of resilience and adaptation. Learners and facilitators worked together to overcome the challenges posed by the world becoming much more dynamic. Our school events played a pivotal role in helping us wade through such challenges. They are always an important aspect of the academic calendar. They not only provide a break from routine classroom activities but also contribute significantly to the overall growth and development of learners.

‘Verve’, our annual sports day, was an important event that was held in the last academic year wherein our learners participated in various sporting activities such as running races and relay races. Our special assemblies and Anand – Utsav offered learners the opportunity to showcase their learning to the community. These events helped our learners understand the essence of a community and the relevance it holds in the overall nurturing of the individual. These events also provided a platform for learners to showcase their talents in various fields such as music, dance, and drama.

Learners across all grades enthusiastically participated in all the activities of the ‘Frost Fair’ from decorating your own cupcake, painting a pot, bouncy, singing and painting your T-shirt. They were awarded with participation certificates for singing and painting your T-shirt. They enjoyed doing all the activities and participated in all the competitions with great vigour and passion.

**Learners participated with great enthusiasm at different events.**

The Science lab also became functional, and our learners enthusiastically demonstrated aptitude for practical science applications. It provided them with an opportunity to showcase their scientific knowledge and creativity, while aiding critical thinking and problem-solving skills.

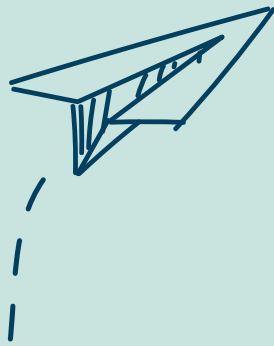

**Learners working in the Science Lab.**

Field trips and educational tours such as Beejom Farm visit and Jim Corbett Park were another important aspect of our academic calendar. These excursions provided learners with an opportunity to learn outside the classroom environment that helped broaden the learners' knowledge and understanding of the world around them.

Celebrations throughout the year in school helped reinstate ethical values in children and gave them a sense of conscientiousness. The folk tales and morals associated with the festivals or events provided a great learning lesson within and outside the classroom space.

Member of Faculty

# Montessori

The youngest learners of the school engaged in activities to develop concentration, fine motor skills, a good self image, sense of responsibility, appreciate the environment and gain independence.

The learners activated their thinking skills, developed the power of observation, attention, refined their visual and tactile senses, eye hand coordination and three finger grip mechanics for writing. Learners enhanced their creative thinking skills by expressing their feelings through colours. They used their self-management skills as they displayed good body control and safely used the tools during various activities like matching Montessori colour tablets, stringing beads and seriating knobless cylinders. The learners observed that colours can change while going through different processes and new colours can be formed. It was an exciting moment for them and they enjoyed it thoroughly.

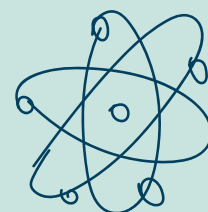

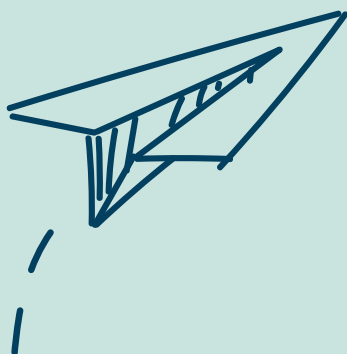

## I'm Mathelete!

Learners learnt the number names and gained a muscular impression of appropriate quantification for each numeral. They also oriented themselves to the world of shapes. Tracing the 2 dimensional shapes and fixing them in the corresponding insets allowed them to self assess their learning.

Learners doing the number activity.

# Nursery

## Joy Box – Thanking The Class Didi

Nursery learners collected various items like dry ration and toiletries to create a 'Joy Box' for their class didi as a token of 'gratitude' towards her. This collaborative engagement helped them understand their relationship with their class didi and think about the ways they can nurture this relationship.

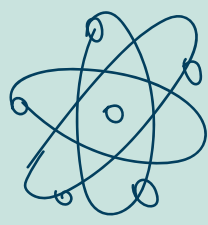

**'Parent and I' Session** - Parents were warmly welcomed by nursery learners to participate in their daily learning. Parents got a sneak peek into a regular day at school and participated in all the activities like circle time, sorting, matching, rangometry, counting and writing numbers with a lot of zeal and excitement.

Learners enjoyed the Parent and I session.

**Visit to Beejom Farms** - Outbound Learning trips strengthen learner's inquiry. Field trips involve direct and focussed reflection on their experience and application of newly developed learning to new situations. In the Unit of Inquiry 'Sharing the Planet' with 'Interdependence' as a conceptual lens, learners of grade nursery visited Beejom Farm to experience visual and tactile learning of different types of plants and delve into the importance of living beings. They saw different coloured lettuce, cabbage, tall banana trees, radish, onion, potato and carrot growing in the soil. They fed fodder to goats, cows and horses. They could identify living beings as an important part of the planet Earth.

# Kindergarten

**'Parent & I'** - Kindergarten learners welcomed the parents in class to experience the learning that happened throughout their day. Parents participated with a lot of enthusiasm and zest in all the engagements.

**Parent and I session.**

**Anand Utsav** - Our Early year rockstars enjoyed the limelight as they performed with grace and confidence on 'Anand Utsav'. They displayed their performing arts and communication skills as they sang melodiously, danced gracefully and carried themselves with poise while on stage. It was a proud moment for the facilitators and parents to see them be independent and smiling on stage.

**Learners performed with grace and confidence.**

**Graduation** - Kindergarten celebrated their first milestone; graduating to primary school. They were so excited and had a fun time while they sang, danced, watched a movie and shared yummy treats with their friends. They went home proud, donning their graduation hats and sashes and carrying with them, wonderful memories of the day.

**Learners celebrating their first milestone.**

**Field trip to the Supermarket** - Kindergarten learners engaged in an enriching experience during their trip to the supermarket. They enhanced their 'Research skills' while they questioned the store manager about how they had organized the material at the store. They displayed excellent 'Thinking skills' when they analyzed the groceries. They made independent decisions when they used their own money to buy a few things for themselves.

**Learners were excited and engaged during their trip to the supermarket.**

# Grade I

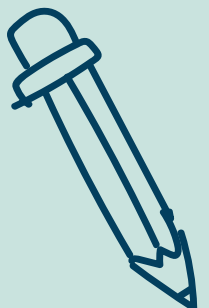

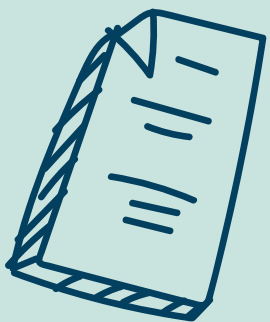

**Grade I had a year filled with learnings and accomplishments.**

A get-together for the learners and their parents was organized in their classroom, where everyone got to know each other's family culture and tradition. Grade 1 families shared a few of their rituals and traditions that brought forward the idea of diversity and co existence.

**Learners performed with grace and confidence.**

Expressing gratitude is an important aspect of building positive relationships and cultivating a sense of community. The learners expressed their gratitude towards those who help them and displayed respect and appreciation for them.

Learners religiously followed the breathing exercise ritual in the class circle time. Practicing breathing exercises in a group helped the learners build a sense of community and connection. They worked towards managing their emotions by practicing these to calm themselves down when they felt overwhelmed.

**Learners expressed their gratitude towards people who help them everyday.**

**Learners participating in class activities.**

# Grade II

Learners of grade II showcased the true spirit of patriotism in the Special Assembly. Understanding the creation of our Constitution, sharing the inspirational messages from the great Indian leaders and the spirited dance performance on the medley of patriotic songs, boosted the love for our country.

**Learners participated in Republic Day celebrations.**

## **Visit to Sunder Nursery**

Learners visited the Sunder Nursery, formerly called Azim Bagh which is a 16th-century heritage park complex. It gave the learners an opportunity to understand culture and traditions from a historical perspective. It also encouraged the learners to know about the importance of the preservation of culture.

Reflection of our learners.

### Integrating with Visual Art

The learners understood a brief history of Western Art and its evolution from the Prehistoric era to contemporary art practices. They practised and learned about cave art and understood how through art the early men communicated and left pieces of evidence of the prehistoric era and their lifestyle. They were briefly introduced to Renaissance art, Cubism and finally installation art to understand the development and changes in art over the period of time. They worked on an individual as well as collaboratively created unique art pieces.

# Grade III

## **Kathakar - International Storytellers Festival Field Trip to Sundar Nursery.**

***'It is better to see something once than to hear about it a thousand times.'***

Field trips provide authentic, hands-on experiential learning opportunities where learners can connect what they are learning in the classroom to a real life situation.

The young, enthusiastic learners of grade II went to Sundar Nursery on 28th November, to witness a live story telling session. This was the first outdoor trip from school after the pandemic.

The learners got an opportunity to listen to stories from Korea, Mongolia and the UK. The story tellers brought the characters to life and mesmerised the learners by their narration, voice modulation and special effects.

**Learners thoroughly enjoyed their visit to Sundar Nursery.**

## **Children's Day - 14th Nov**

The learners of grade III had a fun filled day on 14th November. They came to school dressed in colourful clothes, had fun playing with balloons, reading the messages sent by their parents and watching a movie in school. They also enjoyed watching their facilitators sing and dance for them. Special lunch served for them made the day even more memorable.

**Learners celebrated children's day with great enthusiasm**

**Republic Day Celebrations**

Patriotic fervour was at its peak as the learners celebrated the 'Republic Day,' in school. The decor and the boards made by grade III learners was praiseworthy.

# Grade IV

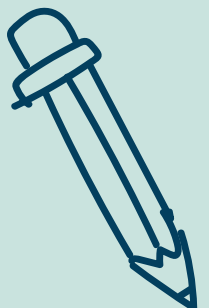

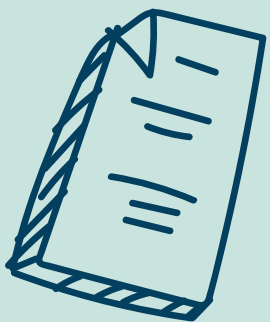

Learners went on an educational outstation trip to Jim Corbett National Park, Uttarakhand from 24 th Feb 2023 to 26 th Feb 2023. The trip was organized in collaboration with 'Rocksport' who are specialized in outstation educational trips and are working with various good schools. Trip included various thrilling and adventurous activities like nature walk, jungle safari, body surfing, pugmark study, village visit, journal writing (reflection time), collaborative and team building games, pool party, bonfire, DJ night and much more.

# Grade V

## Science Lab

The science lab became functional. The Learners dissected a flower for seeing the parts of a reproductive flowering plant in real life as their inaugural activity. Learners actively participated and performed the dissection with utmost sincerity and diligence.

## Beejom Farm Visit

The learners from early years to grade V were showcased the sustainable measures used by the farm to plant crops and rear animals. Learners enjoyed the overall environment of the farm. Beejom is an animal sanctuary and sustainable agricultural farm.

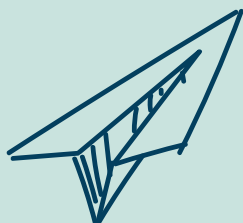

## Indocopter Trip

The Learners visited Indocopter Pvt Ltd which served as an excellent opportunity for our learners to know about the functioning of helicopters, which enhanced their understanding of the working of machines.

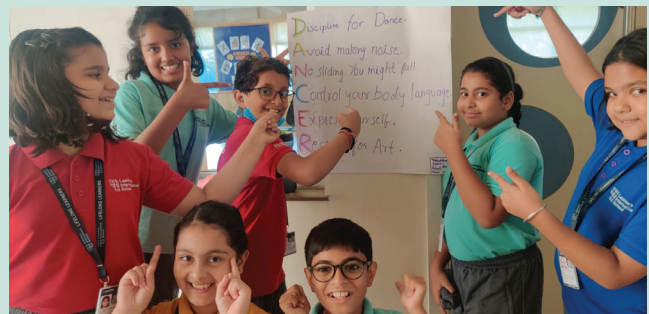

**Learners enhanced their understanding of the working of machines.**

# Performing Art

## DANCEPIRATION - A shortcut to happiness!

The first meeting is the most special of all. That day can never be forgotten. Who knew that while dancing we all were making unforgettable memories. With so much enthusiasm and sparkle in eyes, learners created their classroom rules together on the very first day and made it memorable with a dance session.

Just like its name 'Anand Utsav', the event was a real delightful treat, not only for the audience, but also for the learners. They thoroughly enjoyed the complete process - from planning to execution and practicing in the dance hall to performing on stage.

Zestful, dynamic and bouncy - exactly how sports day was spent. Learners stepped forward to create something never seen before. They decided to use basketballs and hoops for dance performance to cheer up sports race participants and filled the audience with enthusiasm with their zumbastic performance.

# Visual Art

## Collaboration is our Motivation

In Visual Arts learners created fabulous art pieces and showcased their flair and creativity. However, it was more endearing to see the initiative, collaboration and integration amongst learners across grades. They shared their experiences and learnings with each other.

## Community Celebration!

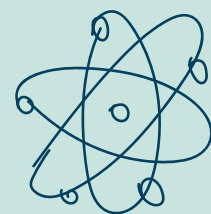

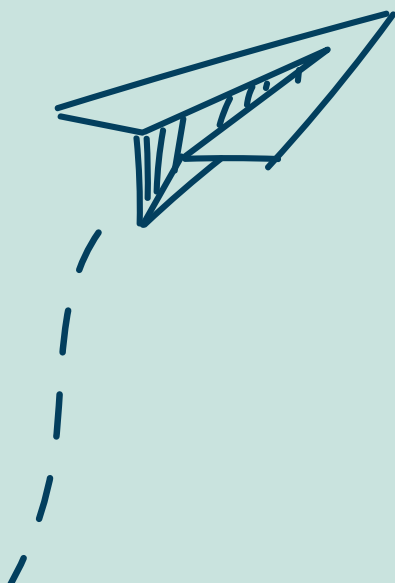

As a part of the school community it is essential to encourage the learners to celebrate all festivals and events together. Diwali was one such occasion where all the learners celebrated it collectively in its true spirit and essence.

They created a massive floral rangoli. Learners from Early years to Grade V participated enthusiastically in the activity and made it a huge success.

## Integration of Art and Music

To promote the transdisciplinary approach to learning, the facilitators strive to collaborate with every subject to make the learning experience effective but more importantly joyful. Art and Music integrated to showcase the various emotions of the learners by stimulating it through music and portraying it on paper with vibrant colors.

# Physical Education

## Flow & Glide - Skating Event

Learners from Kindergarten to grade V participated with a lot of enthusiasm in the skating event held at school. Even the ones who were in very nascent stages of skating put in their very best and showed true sportsman spirit by completing the rounds.

# Verve 2023

Our school held its first annual sports day, Verve on Saturday, 11th February, 2023. The event was held on the school's sports field, and learners from all classes participated in various sports activities. The purpose of Sports Day is to encourage learners to participate in physical activities, develop their sportsmanship skills, and foster a sense of teamwork and camaraderie. Sports Day also provides an opportunity for learners to showcase their athletic abilities and compete against their peers in a friendly and supportive environment.

**Learners geared up for the event.**

**Learners participated enthusiastically in Stack the cone race.**

# Friendly Basketball Match

A team of 13 learners participated in a friendly basketball match against Pragyans School. It helped inculcate team spirit and sportsmanship amongst our young learners.

Learners participated in a friendly match.
